About me

I'm a Junior Product Designer with 4 years of front-end development experience, currently focused on UI/UX design. I have a BA Honours degree in Augmentative and Alternative Communication and a BA degree in Psychology, which have shaped the way I approach design, giving me insight into human behaviour, communication, and accessibility. Combined with my development background, I approach design with both the user and implementation in mind.

Skills

Figma · UI/UX Design · Design Systems · Wireframing · Prototyping · Accessibility · Responsive Design · React · Next.js · TypeScript · JavaScript · HTML5 & CSS · GitHub · JIRA · Confluence · Cypress

Work experience

Junior Product Designer (UI/UX)

2026 – Present

LXE Hearing (hearX, Eargo & Lexie Hearing), SA & USA

- Design responsive UI components and user flows in Figma, delivering accessible, developer-ready experiences aligned with brand guidelines.

- Own the end-to-end design process, from project brief through final handoff, incorporating design feedback to refine solutions.
- Collaborate with developers using detailed Figma specifications, ensuring accurate implementation and smooth design handoffs.
- Apply responsive design and accessibility best practices, creating consistent experiences across desktop, tablet, and mobile devices.
- Document design processes and guidelines in Confluence, improving knowledge sharing and promoting design consistency across the team.

Junior Front-End Web Developer

2022 – 2026

LXE Hearing (hearX, Eargo & Lexie Hearing), SA & USA

- Developed reusable front-end components using React, Next.js, and TypeScript, improving code maintainability.
- Implemented automated tests with Cypress, increasing confidence in feature quality before release.
- Reviewed code through GitHub, strengthening code quality and encouraging team collaboration.
- Tracked development work in JIRA, supporting efficient sprint planning and timely delivery.
- Documented technical changes in Confluence, improving knowledge sharing across teams.
- Maintained secure development practices, supporting compliance within a healthcare technology environment.

Cultural Exchange Program

2017-2018 | 2020-2022

AuPairCare, USA

- Relocated and worked internationally across two programme cycles, adapting to new households, cultures, and environments while maintaining professional responsibilities and managing daily routines.

Certified Cognitive Trainer

2018 - 2020

BrainAbility, South Africa

- Delivered personalised cognitive training programmes, improving attention, memory, and processing skills.
- Analysed client assessment data, tailoring training plans to individual cognitive needs.
- Conducted pre- and post-training assessments using the Gibson Test, informing programme adjustments.
