About me

Junior Product Designer with 4 years of front-end development experience, currently specialising in UI/UX design at LXE Hearing across the Lexie Hearing (affiliated with Bose), Eargo, and hearX product ecosystem. Holding a BA Honours in Augmentative and Alternative Communication and a BA in Psychology, with an instinct for how people think and interact with digital products. Designing with a developer's understanding of what's technically feasible and how to build it.

Skills

Figma · UI/UX Design · Design Systems · Prototyping · Wireframing · Accessibility
Responsive Design · React · Next.js · TypeScript · JavaScript · HTML5 & CSS · Cypress ·
JIRA · Confluence · GitHub · Google Workspace · Slack

Work experience

Junior Product Designer (UI/UX)

2026 – Present

LXE Hearing (hearX, Eargo & Lexie Hearing), SA & USA

- Designing responsive UI components and screen flows for the Lexie Hearing website in Figma, aligned to brand guidelines and accessibility standards.

- Collaborating closely with developers during design hand-off, providing detailed specs and supporting accurate implementation of designs.
- Independently owning the end-to-end design process from brief to final hand-off, incorporating senior design review as a quality checkpoint
- Ensuring all designs are optimised for various screen sizes and devices, applying responsive design principles throughout.
- Proactively pursuing continued learning in UI/UX and mobile design alongside current role, applying new skills and methodologies directly to live work.
- Taking initiative to document design processes and guidelines in Confluence, improving team knowledge sharing and creating a reference resource beyond the immediate design scope.

Junior Web Developer

2022 – 2026

LXE Hearing (hearX, Eargo & Lexie Hearing), SA & USA

- Developed high-quality, maintainable systems using reusable, efficient code in line with team architecture and best practices.
- Implemented and maintained automated tests and component libraries; ensured all work was thoroughly tested and performance benchmarked before submission.
- Participated in peer code reviews, contributed ideas, and incorporated feedback constructively.
- Tracked tasks and progress in JIRA; collaborated effectively across the team to solve problems and discuss best practices.
- Contributed to code-level and system-level documentation, release notes, and cross-team change logs to ensure knowledge transfer and visibility.
- Safeguarded information and data in accordance with company policies, demonstrating accountability in a regulated healthcare-adjacent environment.

Cultural Exchange Program

2017-2018 | 2020-2022

AuPairCare, USA

- Relocated and worked internationally across two programme cycles, adapting to new households, cultures, and environments while maintaining professional responsibilities and managing daily routines.

Certified Cognitive Trainer

2018 - 2020

BrainAbility, South Africa

- Conducted one-on-one cognitive training sessions with children and adults, targeting and strengthening skills including attention, auditory processing, memory, planning, processing speed, and visual processing.
- Analysed client data to track programme progress and adjust training approaches accordingly.
- Facilitated pre- and post-training assessments using the Gibson Test of Cognitive Skills to measure progress and inform programme direction.

Education

Complete Web & Mobile Designer: UI/UX & Figma

Udemy

In Progress

Web Development Certificate

JaxCode Academy, Jacksonville, Florida, USA
